Data Ownership & Privacy always assured

Collaborative Map Data Workflow

A single system for users of different roles.

The Power User:

The software specialist, requiring streamlined tools for managing information and supporting other users in the organization. SimpleLayers provides the Power User with capabilities for:

- Data Management
- Map Development
- Access Control
- Interface Deployment

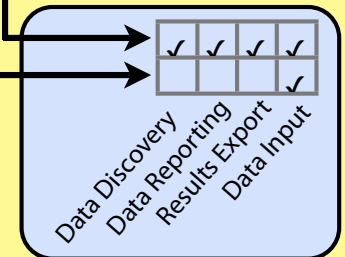

The Executive:

The decision-maker, requiring fast and direct access to information. SimpleLayers provides the Executive with intuitive Data Dashboards for self-service data access.

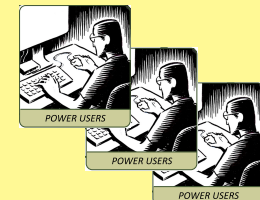

The Staffer:

The field worker, requiring easy data entry. SimpleLayers provides the Staffer with paperless Data Input Forms that are accessible from wireless devices.

Other Organizations:

External organizations that do business with you, requiring access to your maps & data. SimpleLayers provides other organizations with dynamic sharing & collaboration capabilities that cross organizational boundaries.

Clients Include:

Santa Barbara
County, CA

"We would recommend that any public agency with budget / staffing limitations, unmet mandates or just GIS datasets that could be made useful take a serious look at SimpleLayers for their needs."
